

IPNeT 2012

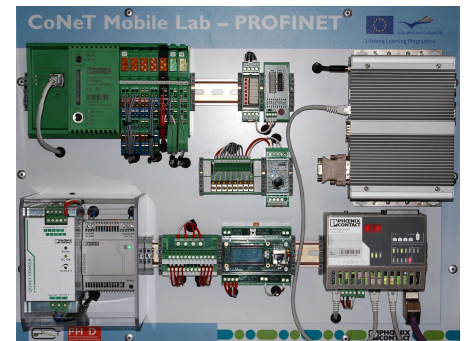

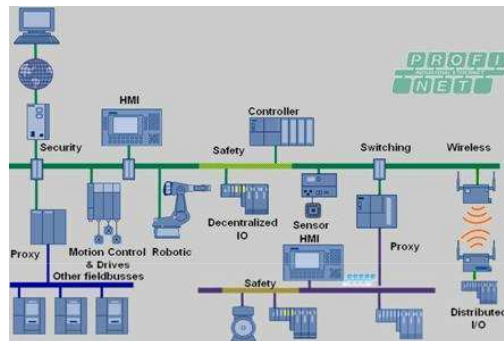

INTENSIVE PROGRAMME

IPNeT – CoNeT Intensive Programme Modern Data Transfer Standards for Industrial Automation

The second edition of the IPNeT takes place at Technological Educational Institute of Crete in Greece from 15th till 28th of July 2012.

IPNeT is an LLP ERASMUS Intensive Programm closely connected with CoNeT Project (Co-operative Network Training). Its topic is *Modern Data Transfer Standards for Industrial Automation*. The main goal of IPNeT is to train participants how to design, build, configure, program and troubleshoot industrial automation systems utilizing different industrial networks for data exchange. IPNeT is a short-term intensive course gathering students from several universities form Europe.

Aims of the Summer School:

- Basics of Ethernet based IO systems
- Profinet on Siemens platform
- Profinet on Phoenix Contact platform
- Ethernet/IP on Allen-Bradley platform

Requirements:

- be a graduate student
- have a good command of spoken and written English
- be able to work and live in a multicultural team
- know the basics of PLCs configuration and programming

More information about the Intensive Programme can be found on the IPNeT website: <http://ipnet.agh.edu.pl/index2.html>
